Full Stack Developer (MERN + PostgreSQL) with UI/UX expertise (GSAP, Framer Motion) and 2 internships in frontend development. Experienced in building responsive websites, collaborating with cross-functional teams, and freelancing as a UI/UX designer. Proficient in WordPress, Shopify, and client-facing project management.

Education & Skills

Panjab University, UIET , BE in Computer Science and Engineering June 2020 – June 2024

Experience

Quantum IT Innovations | Frontend Developer Nov 2024 – May 2025

- Built 4 custom frontend projects while coordinating with UI/UX designers, backend developers, and QA testers.
- Developed and deployed client websites on Wordpress, Shopify, WIX and Web-flow, managing databases via phpMyAdmin
- Led client communication, translating business requirements into technical specs with the BA team, delivering 100% of projects before deadline.
- Collaborated with marketing team to maintain and update internal projects issues (e.g., PHP conflicts, plugin vulnerabilities) while simultaneously delivering high-priority client websites under tight deadlines.

BirthVenue | Frontend Developer & UI/UX Designer Jan 2024 – June 2024

- Designed the company's mobile application Interface, presentation decks and website layout using Figma, following modern UI/UX principles.
- Enhanced the user experience by 30% by re-iterating and while conducting extensive usability testing to ensure responsive design and developed website using ReactJS in collaboration with the team to ensure seamless performance across all devices.

Projects

Ashpm Website [Project Link](#)

- Built and launched a fully responsive website for a real-estate client while directly communicating requirements, feedback and updates.
- Worked with Design team for required assets and also with BA team to make sure each task is completed as per action plan of the project

Continental Fashion [Project Link](#)

- Developed a client-facing fashion website by collaborating with backend developer, UI/UX designers, and QA Testers in a cross-functional team.
- Managed tasks efficiently under strict deadlines while aligning with brand guidelines and ensuring pixel-perfect responsiveness.

SwoleyGym Website [Project Link](#)

- Designed and built a fitness app using ReactJS and Tailwind CSS, focusing on modern UI, performance, and user engagement.
- Created this project to apply and strengthen my React.js skills after learning the framework, making it my complete personal React-based application.
